Dear Sir

Bellevue, Randolph Bliss
from Glasgow July 27 1846 -

74 When I last wrote you, Mr Scott and I were on a flying
visit to the top of Goat-fell one of the summits of
Arran - a pilgrimage we fairly accomplished on
the following day with the thermometer ranging between
80 and 83 - a heat to a hot constitution reaching to the
boiling point. But the magnificence of the scene that
burst suddenly on the view from ~~the~~ elevated spot
amply compensated for the fatigue endured in the ascent.
To the north west a host of jagged barren peaks lifted
themselves wildly into the sky within the circumference of a
few miles, reminding us of the dark forms that arose
abruptly from the infernal lake obedient to the
Master's call "Awake - arise or be for ever fallen" "Suffer
also Sinai and its fiery law - that utters not a word of
grace or mercy to the guilty - to the south east again
hills were rolling and verdant, and the water terminated
by a few promontories like Carmel, and by Holy Island
sitting peacefully in the deep in front of Sun-lark bay
the Hamans Haven, brought to mind the gentle accents
and joyous tidings of the gospel of peace. In such a scene, like
at Niagara, there is the impression on the mind of bygone
energy and eternal power - nothing further has occurred
Send you however three leaves of the report of the proceedings
of the last General assembly's report as they contain interesting
American matter. I also enclose a draft for £3 as I fear
my demands have exceeded my remittance. Truly yours
John Dunlop
